

Senefelder-Schule Treuchtlingen

Erasmus+

DECLARATION OF ATTENDANCE

“Water Our Precious Treasure”

2016-1-PL01-KA219-026557

ERASMUS+ K.A. 2, Cooperation and Innovation for Good Practices - School Education

This is to confirm that

Vairot Samantha

From **Lycée E.J Marey, Beaune, France**

Has attended a

Transnational teaching/learning /training activities

During the mobility the coordinators have shown how they achieved the goals of the project according to the timetable of the projects activities. In addition to presenting their videos on “water sports in our region”, students from each of the partner schools gave presentations on their scientific projects in the fields of “virtual water in local products” and “micro plastics”.

The teachers and the students have participated in several field trips. Guided by local experts, they got insight into the Franconian Lake District Water Management Project and the tourism economy of the region. Taking a hands-on approach digging for fossils, an excursion to the Solnhofen geological and paleontological museum and quarries illuminated the Jurassic past of the region.

The pupils and teachers that have taken part in the teaching/learning/ training activities in “Senefelder School” Treuchtlingen also used their creative energy in arts workshops organised in cooperation with the “European House” in Pappenheim, a EU-funded center for Europe-related (advanced) education, research and political decision-making. Three artist taught techniques enabling the students to create works of art connected to water.

Organized by **Senefelder School Treuchtlingen**

Between **09.11.2017 and 15.11.2017**
