

Erasmus+

DECLARATION OF ATTENDANCE

Water, our precious Treasure

"Co-funded by the Erasmus+ Programme of the European Union."

2016-1-PL01-KA219-O26557

ERASMUS+ K.A. 2, Cooperation and

Innovation for Good Practices – School Education.

This is to confirm that Honorine BLONDEAU
From Lycée E. J. Marey, Beaune France

Has attended a :

Transnational teaching/learning /training activities

During the mobilities the coordinators have shown how they achieved the goals of the project according to the timetable of the project activities. They visited Beaune's natural outdoors swimming pool and saw for themselves the impacts of a naturally-filtered pool on regenerated water through an organic self-purification reed-based system and discussed with management its impact on local flora and fauna and tourism.

They also visited a water recreational site based on land redevelopment in the aftermath of the building of the A6 Motorway in the 1970s centred on preserving a natural habitat for birds. In Dijon, they focussed their attention on a man-made lake in an urban setting and went kayaking.

The students and the teachers who have taken part in the teaching/learning/training activities in "Lycée Etienne-Jules Marey" also visited a wine estate and carried out a chemical study of the soil to be found in the vineyards in measuring its pH content and water stress through laboratory experiments in pair works.

Using different ICT Tools, students presented workshops featuring the different process-making of a famous local produce from their country entitled « From grapes to wine », « From apples to juice », « From rose petals to perfume », « From grain to bread » and « From sunflower to oil ».

Some 35 different mineral waters emanating from the 5 participating countries were sampled and presented to fellow students and then displayed in the school's pedagogical shop-window for all to see.

Organized by
